TRIMMER & POLLINATOR

12 LBS. POLLINATOR & TRIMMER

BY HIGH TECH

\$4800.00

- The 12 lbs. pollinator/ trimmer features standard with each unit a 12 lbs. capacity 70-micron basket and trimmer basket.
- The machine easily returns 25% of pollen in 25 minutes, when ingoing product in frozen for 3 hours at 15 F.
- Simple changing of baskets allows for seamless processing.
- Perfect output for rosin!

DESCRIPTION

The 12 lbs. Pollinator and Trimmer includes a Contained Barrel and Catchment System. The unit includes one Trimmer Barrel and one 70 Micron Basket. Material is best prepped by being ground and frozen for four hours.

FEATURES

- Power: 120 50/60 hz
- Timer: up to 300 mins
- Capacity: 12 lbs.
- Motor: 1/2 HP.

EXTRACTION EQUIPMENT

EXTRACTION CONTRAPTION

ORIGINAL MODEL

\$620.00

The Original Extraction Contraption harnesses the sub-zero temperatures of dry ice sublimation along with centrifugal force to produce plant essence in a fraction of the time of traditional processes. There is no water or harsh chemicals used during the extraction process. In fact, our process actually removes much of the plant's natural moisture. The final essence is a fine, dry powder.

DESCRIPTION

The Original Extraction Contraption cone is constructed of high quality stainless steel. and has an optional compactor so you can process and package your plant extraction quickly and easily. Plant processing times vary. Hardy, small mass plants like pine can take up to 45 minutes. rosemary takes approximately 30 minutes, while lavender can be processed in about 10 to 15 minutes.

The Original Extraction Contraption is ideal for lotions, soaps, scents and other non-edible plant essence products. If you need plant essence suitable for human consumption, please refer to the Extraction Contraption Pro System.

NOTE: The mixer unit is sold separately and can be purchased at any Harbor Freight. Ask for Central Machinery – Item#91907

EXTRACTION EQUIPMENT CONT.

2 LBS. TRIMPAL TUMBLER BASKET

4 UNIT MODEL

\$1600.00

The Trimpal 4 lb machine now allows you to extract all your kief and pollen using a special kief tumbler and pollen collection basket.

DESCRIPTION

The TrimPal 4 lbs. machine now allows you to extract all your kief and pollen using a special kief tumbler and pollen collection basket. The basket works in the same machine and is constructed of 304 stainless steel. The kief tumbler/pollen basket is made of high grade 70-micron mesh and is very simple and easy to use, just like all of Trimpal's products.

The outer capture system bolts into the back motor and the kief basket has an easy release system. The plastic lid is thicker than our standard trimmer lid to withstand extreme cold temperatures if dry ice is added. If you will be using dry ice/cold temperatures, then freezing your material for 3 hours is recommended.

REPLACEMENT SCREENS

\$30.00

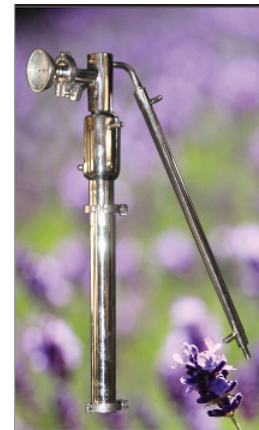

Official Extraction Contraption pollinator screen. These screens are made of durable material that can withstand sustained sub-zero temperatures associated with the extraction process. These screens fit both the Extraction Contraption Pro System and the Extraction Contraption Original. Screens are available in four different micron sizes: 75, 100, 125 and 150

EXTRACTION CONTRAPTION

PRO SYSTEM DISTILLATION COLUMN

\$30.00

The Extraction Contraption Pro System Distillation Column converts the Extraction Contraption Pro System dry ice extraction system into a distillation unit. The Extraction Contraption Pro System Distillation Unit provides the ability to perform steam distillation and the production of organic solvents and bio-fuels. We recommend packing the distilling column with copper mesh to remove sulfur based compounds during the distillation process.

*NOTE:

We provide detailed assembly instructions. However, reflux and retort towers can perform a variety of functions including hydro sols, water distillation, bio fuel production, etc. and there is an abundance of information available in print and on-line regarding all of these procedures. We assume that the purchaser is fully trained or will obtain the information necessary to perform their intended production method.

ROSIN PRESS ACCESSORIES

DUAL PLATE ROSIN PRESS

HEAT HYDRAULIC

\$6200.00

The Neo Farms hydraulic rosin press features adjustable pressure and adjustable heating for all three platens. Featuring automatic and manual option is optimal for high production processing. The hydraulic pump keeps away that noisy air compressor. This machine is built to last and features a 1 year warranty.

SPECIFICATIONS

- Heat Press Style: Hydraulic Automatic/Manual Press.
- (2) 16" x 16" Platens.
- Gauge Reading: Fahrenheit or Celsius degree measure.
- Digital Temperature Control.
- Digital Automatic Timer.
- Voltage: 220v, single phase, 50/60hz.
- Temperature Range: 0° – 752° F.

YIELDS

KIEF

Average: 55%

BUBBLE

Average: 75%

FEATURES

- Rugged and durable for years of trouble-free performance.
- Operating manual.
- Thick items capable.
- Micro-processor precision heat and temperature gauge.
- Scratch resistant baked-on paint.
- Full range heating coils for quick heat up.
- Heat indicating light.
- Electronic time control.
- Commercial business grade.
- Up to 4000lbs of pressure.
- Safety Scram Button or Emergency Lift Button.
- Hands Free Operation.
- Independently Controlled Dual Source Heating Plates.

ROSIN PRESS COMMERCIAL

20 TON ROSIN PRESS

\$12,100.00

SPECIFICATIONS

- Power: 220V/60hz/10 Amps.
- PSI: 1400 PSI.
- Tons: 20.
- Weight: 1100 lbs.
- Safety: Curtains.
- Certifications: CE.
- Heating: Dual.
- Plate: 13"x13".
- Motor: Hydraulic.

SHORT PATH

\$55,000.00

SPECIFICATIONS

- Evaporation Area: 124 cm².
- Ultimate pressure: 0.001 Mbar.
- Film System: Wiper.
- Residual Recycling System: Yes.
- Vacuum System: Vane pump + Diffusion pump.
- Chiller: Not Included.
- Cooling/heating: To be Config.
- Jacketed Feeding Flask: Optional.
- Large Capacity feeding/Collection: Optional.
- Area: 4x2x6 ft.
- Power: 220V.
- Please inquire for customization.

ROSEN TUBES

STAINLESS STEEL XL FILTERS

20 MICRON THREE PACK

\$16.00

50 MICRON THREE PACK

\$20.00

Each three pack includes the largest in class rosin tubes. The food grade stainless allows you to wash and reuse the tubes. The 20-micron rosin tubes allow for the best pressing experience and can be cut to size for smaller squeezes. The dense mesh allows for zero blow out!

Rosin terp tubes are premium food grade stainless steel cylinders that are excellent for rosinning your favorite herbal concentrate. Cut to size, fill with herb, fold ends and press. There are three 11 inch tubes per pack. Terp Tubes can be reused many times and won't leach any toxins or off flavors. Not recommended for whole herbs or flowers.

2 TON

ROSIN PRESS

SILICON INSERTS

\$42.00

DESCRIPTION

- Used on the 2 Ton Rosin Press.
- FDA Approved, high heat silicon.
- Cleanable.

SUPERCRITICAL CO₂ EXTRACTOR

VARIOUS PRICING

The SFCE Botanical Extraction System functions as a bulk-scale, high-pressure separator or collecting extracted compounds. It provides extraction efficiency and selective fractionation of an extract in a single run. With the SFCE BES, you'll see increased consistency of final product, from run-to-run.

Because of the ability to run at increased pressure, extractions can happen faster – up to four times faster than in other systems – and at a decreased temperature, which means cleaner extracts due to less decarboxylation.

The SFCE Botanical Extraction System functions as a bulk-scale, high-pressure separator for collecting extracted compounds. It provides extraction efficiency and selective fractionation of an extract in a single run. With the SFCE BES, you'll see increased consistency of final product, from run-to-run.

Because of the ability to run at increased pressure, extractions can happen faster – up to 5 times faster than in other systems – and at a decreased temperature.

Note:

1. The quotations above are FOB Grass Valley
2. The quotation doesn't contain our technicians travel expenses.
3. Price contains one year spare parts;
4. Delivery time: 2-4 months or less after validation of contract; Dependent on size and stock.
5. Payment: 60% advance payment and 40% finish payment before delivery;
6. The manufacture standard is according to US ASME standard.
7. The final test will be held in factory, we will arrange shipment after the test and approval by customers.

Equipment Warranty:

The following terms of warranty by Neo Farms are for the customer only and may not be assigned to third parties.

Neo Farms warrants that all equipment shall conform to specifications and descriptions. All equipment shall be merchantable and sufficient for the purposes, which are known by neo farms and any services shall be rendered in a good and workmanlike manner by skilled personnel. Neo Farms further warrants all equipment against any defects in material for 12 months. Neo Farms shall not warranty or be liable in any way for any equipment sold to customer, which is used for an unknown or improper purpose.

Neo Farms warranty cover parts and service. After consultation with a certified technician, Neo Farms and the customer will determine whether an onsite repair will be made, or whether the unit will be returned for service. Travel time will be charged at prevailing rates. Travel expenses will be charged at cost. If the unit is shipped back to the customer, the customer will be responsible for packaging and shipping costs. Neo farms shall not be responsible for items that are not removed or that are damaged before they are received by Neo farms or its designate, Neo farms must select or approve the carrier used by the customer. All equipment shall be prepared for shipment in a manner that follows good and customary commercial practice and is adequate to ensure safe arrival for the ordered equipment.

Returns:

The customer shall mark all containers with the return materials authorization number issued by Neo Farms LLC at the time of the customers contact to request warranty repairs, as well as pertinent shipping information and a complete description of the reason the customer is seeking a repair. Notice of returns shall be made by email.

Exclusions:

This warranty does not cover normal maintenance, damage due to fire, flood or other acts of nature, misuses, unsuitable utilities, or electrical disturbances, damage due to unapproved thermal fluids, improper installation, improper or unauthorized repairs, damages incurred in shipping.

All glassware and accessories are expressly excluded from this warranty declaration.

The following items are not included under this contract: Paint, logos, covers, accessories, switch covers and trim, fabricated metal parts, power cords, communication cables, hoses, connectors, clamps, thermal fluids, glassware, gasket, unauthorized opening, modification of the unit, including, but not limited to usage for other than the intended purpose.

Claims:

Any claims under these warranties must be made to Neo Farms before the end of the warranty period. Notice of a claim shall be made by email. Neo Farms shall not be responsible for labor other than that performed by Neo Farms Personnel.

Parts:

Part(s) replacement does not constitute an extension of the original warranty period. It is the Customer's responsibility to pay for parts, labor and shipping for non-warranty repairs. Purchase orders will be required for parts and labor for all non-warranty repairs. In no event will Neo Farms be liable for damages as a result of the unavailability of parts. Should the customer carry out a repair, Neo Farms will replace the defect component when it is returned immediately after the repair and Neo Farms verifies that the component has failed in normal usage. If Neo Farms does not receive the defect part within four (4) weeks, even in the warranty period, an invoice will be issued for the defective part. Additional terms of purchase.
